

**IntegSec External Vulnerability Assessment** combines automated monthly scanning with certified analyst validation. We identify real vulnerabilities on your internet-facing assets, eliminate false positives, and provide clear remediation guidance—all at predictable monthly pricing with unlimited retests.

## WHAT WE SCAN

- > Public-facing web applications
- > Email and mail servers
- > VPN and remote access portals
- > DNS and domain infrastructure
- > Cloud-hosted services
- > API endpoints
- > Network perimeter devices
- > SSL/TLS configurations

## DELIVERABLES

- > Monthly vulnerability scan reports
- > Expert-validated findings (zero false positives)
- > Executive summary for leadership
- > Detailed technical findings
- > Prioritized remediation guidance
- > Risk scoring with business context
- > Compliance mapping documentation
- > Unlimited retests to verify fixes

## Service Options

### Starter

**\$299/mo**

1-5 External IPs

- > Monthly vulnerability scans
- > Expert validation of findings
- > False positive removal
- > Portal access for tracking
- > Email support
- > Unlimited free retests

### Professional

**\$899/mo**

6-24 External IPs

- > Everything in Starter
- > Use your scanners or ours
- > Aggregated remediation plans
- > Portal with historical trending
- > 10% annual discount available
- > Priority support

### Enterprise

**Custom**

25+ External IPs

- > Everything in Professional
- > App & internal scanning
- > Dedicated security analyst
- > Executive-ready dashboards
- > Custom scan profiles
- > Continuous remediation tracking

# How It Works

### 1. Discovery

We map your external attack surface and identify all internet-facing assets

### 2. Scan

Monthly automated scans identify vulnerabilities across your perimeter

### 3. Validate

Certified analysts review and eliminate false positives

### 4. Report

Receive prioritized findings with clear remediation steps

### 5. Remediate

Your team fixes issues with our guidance and support

### 6. Verify

Free retests confirm your fixes work and close the loop

## Compliance Frameworks Supported

SOC 2

PCI DSS

HIPAA

ISO 27001

NIST CSF

Cyber Insurance
