INTEGSEC   NEXT LEVEL CYBERSECURITY

External Vulnerability Assessment

Continuous Scanning with Expert Validation

Know what's exposed on your perimeter before attackers do

Monthly Scans • Zero False Positives • Unlimited Retests

Your Attack Surface Is Always Growing

New services, cloud migrations, and shadow IT create gaps faster than annual scans can find

85%
of breaches exploit known vulnerabilities that could have been patched

206 days
Average time to detect a breach in enterprise environments

75%
of organizations have unpatched critical vulnerabilities

DIY Scanning vs Expert Validation

DIY Scanning Tools

> Up to 80% false positive rates

> Requires security expertise to interpret

> No prioritization or context

> Raw data dumps, not actionable reports

> You're on your own for remediation

> No compliance documentation

IntegSec Assessment

> Zero false positives guaranteed

> Certified analyst validation

> Business-context prioritization

> Executive and technical reports

> Clear remediation guidance

> Compliance-ready documentation

We eliminate the noise so you can focus on fixing what matters

How It Works

A simple 6-step process from discovery to verification

1. Discovery
We map your external attack surface and identify all internet-facing assets

2. Scan
Monthly automated scans identify vulnerabilities across your perimeter

3. Validate
Certified analysts review and eliminate false positives

4. Report
Receive prioritized findings with clear remediation steps

5. Remediate
Your team fixes issues with our guidance and support

6. Verify
Free retests confirm your fixes work and close the loop

Simple, Predictable Pricing

Starter

$299

per month • 1-5 IPs

> Monthly vulnerability scans
> Expert validation of findings
> False positive removal
> Portal access for tracking
> Email support
> Unlimited free retests

Professional

$899

per month • 6-24 IPs

> Everything in Starter
> Use your scanners or ours
> Aggregated remediation plans
> Portal with historical trending
> 10% annual discount available
> Priority support

Enterprise

Custom

25+ IPs

> Everything in Professional
> App & internal scanning
> Dedicated security analyst
> Executive-ready dashboards
> Custom scan profiles
> Continuous remediation tracking

What We Scan & Deliver

What We Scan

- Public-facing web applications
- Email and mail servers
- VPN and remote access portals
- DNS and domain infrastructure
- Cloud-hosted services
- API endpoints
- Network perimeter devices
- SSL/TLS configurations

What You Receive

- Monthly vulnerability scan reports
- Expert-validated findings (zero false positives)
- Executive summary for leadership
- Detailed technical findings
- Prioritized remediation guidance
- Risk scoring with business context
- Compliance mapping documentation
- Unlimited retests to verify fixes

INTEGSEC

Compliance Frameworks Supported

Audit-ready reports designed for your compliance needs

SOC 2

Continuous monitoring satisfies Type II requirements for Trust Services Criteria

PCI DSS

Quarterly external scans per Requirement 11.2 for payment card handling

HIPAA

Technical safeguard risk analysis for healthcare data protection

ISO 27001

Vulnerability management control evidence for certification audits

NIST CSF

Framework alignment for Identify and Protect functions

Cyber Insurance

Documentation to satisfy policy requirements and renewals
