IntegSec offers three core security assessment services, each designed for different security maturity levels and objectives. This guide helps you understand which service—or combination of services—best fits your organization's needs, budget, and compliance requirements.

Our Three Security Services

External Vulnerability Assessment

$299 - $899+/mo

Continuous monthly scanning of your internet-facing assets with expert validation to eliminate false positives.

KEY FEATURES

> Monthly automated scans

> Expert validation (zero false positives)

> Remediation guidance

> Compliance-ready reports

> Unlimited retests

Best for: Ongoing perimeter monitoring

Pentest as a Service (PTaaS)

$6,999 - $19,999+/mo

Continuous penetration testing through a subscription model. Deep-dive testing of apps, networks, and cloud environments.

KEY FEATURES

> Certified expert testers

> Next business day onboarding

> Real-time findings portal

> Unlimited retesting

> Compliance support

Best for: Finding exploitable vulnerabilities

Red Team & Adversary Simulation

$699/mo - $9,999+ per engagement

Real-world attack simulation to test your detection and response capabilities using MITRE ATT&CK TTPs.

KEY FEATURES

> AI + human operators

> MITRE ATT&CK aligned

> Detection gap analysis

> Executive reporting

> SOC improvement guidance

Best for: Testing detection & response

Feature Comparison

CAPABILITY	VULN ASSESSMENT	PTAAS	RED TEAM
Primary Goal	Find known vulnerabilities	Find exploitable weaknesses	Test detection & response
Testing Approach	Automated + validation	Manual expert testing	Adversary simulation
Frequency	Monthly (continuous)	On-demand (subscription)	Quarterly or per-engagement
Scope	External perimeter only	Apps, networks, cloud, mobile	Full org (people, process, tech)
Social Engineering	Not included	Optional add-on	**Included**
SOC/Detection Testing	Not included	Not primary focus	**Primary focus**
Compliance Reports	**Included**	**Included**	**Included**
Entry Price	$299/mo	$6,999/mo	$699/mo

Which Service Do You Need?

"We need to know what's exposed"

You want continuous visibility into vulnerabilities on your internet-facing systems without the overhead of manual testing.

External Vulnerability Assessment

"We need to find security holes"

You want expert testers to find real, exploitable vulnerabilities in your applications, networks, or cloud infrastructure.
Pentest as a Service (PTaaS)

"Can we detect real attacks?"

You have security controls in place and want to validate that your team can detect and respond to realistic threats.

Red Team & Adversary Simulation

Security Maturity Progression

FOUNDATION

Vulnerability Assessment

Start here. Know your external exposure. Build remediation processes.

GROWTH

PTaaS

Go deeper. Find what scanners miss. Test applications thoroughly.

ADVANCED

Red Team

Test defenses. Validate your SOC. Train your team under fire.

Quick Decision Guide

Choose Vuln Assessment If…

> Budget is under $5K/month

> Primary concern is compliance

> No dedicated security team

> Need continuous monitoring

> External perimeter is main concern

> Building security program from scratch

Choose PTaaS If…

> Building or updating applications

> Need deeper testing than scans

> Compliance requires pentesting

> Want on-demand expert testing

> Need to test internal networks

> Cloud security is a priority

Choose Red Team If…

> Already have mature pentest program

> EDR/XDR/SIEM deployed

> Have SOC team or MSSP

> Board wants assurance

> Testing human element matters

> Need MITRE ATT&CK coverage

Not Sure Which Service Is Right?

Talk to our team. We'll assess your current security posture and recommend the right starting point.
